Dear Family:

We are using the online assessment system called Child Plus as a developmental tracking tool used to store your child's progress. This is not a permission slip, instead we are just informing you that your child's name will be used on a secure website.

The following information will be on this secure site about your child:

- Your child's name, date of birth, their progress and observations.
- Demographic information including: child's primary language and ethnicity, whether the child has an Individual Education Plan, the program in which the child participates, child's age group and class.

Child Plus uses standard security measures including Secure Sockets Language encryption and firewalls, to prevent unauthorized access, safeguard confidentiality, and ensure the correct use of information about children.

Access is limited to only those individuals that are linked to your child's classroom or HB caseload and appropriate central office personnel.

Sincerely,

NORTHWESTERN OHIO
